PRESS RELEASE

September 03, 2013

FOR IMMEDIATE RELEASE

GPLN member Maritime Synergy beats the constraint of loading space

Last month Maritime Synergy (Thailand) Co., Ltd., a GPLN member based in Laem Chabang, Thailand, handled the oversized shipment of a 40'Flat Rack container out of Laem Chabang port to the final destination in Columbia.

MST was fully responsible for the loading, lashing, transport, and delivery of a gigantic loom; used in textile industry, with unit weights of over 40 MT from the shipper's premise to the hands of actual consignee. The size of the cargo made the move complicated and difficult as the entrance and loading area in the shipper's premise was very narrow.

Since the factory is located in Bangkok where riving trailers are strictly forbidden to operate between 5-9 am and 3-8 pm, MST had to manage the delivery time with the shipper. Since the value of the cargo was over 400,000 USD, MST had to make sure that this expensive cargo wouldn't toss and turn and was safely secured for this delicate transportation.

Pictures of Maritime's moves can be seen on GPLN's Facebook pages:
