PRESS RELEASE

September 10, 2013

FOR IMMEDIATE RELEASE

GPLN member Heavy Logistics moves cold-former machine

Heavy Logistics was recently contracted to organize the door-to-door project delivery of a packed cold-former machine, weighing 176 tons and measuring 15.65m x 3.80m x 3.90m, from Belgium to inland U.S.A. (Mauston, Wisconsin).

The "Heavy Lifting & Handling" department took care of the load-out at the factory with their gantry crane & rolling system, after which the case was transported on a 16-axle hydraulic modular Scheuerle-trailer to a nearby inland terminal.

Meanwhile the department "heavy pilots & permits" supplied the necessary road permits and police authorizations. The next step in this project will be to load the machine onto a barge, which will travel to Vlissingen, where it will be transferred to a Grieg Star vessel and shipped to Houston, TX., U.S.A.

In Houston, the case will be transshipped onto a 16-axle railway platform car, and travel 2000km to New Lisbon, WI., where the last 20km to Mauston, WI., will be bridged by a modular transporter.

Pictures of Heavy Logistics' moves can be seen on GPLN's Facebook pages:
