PRESS RELEASE

June 23, 2014

FOR IMMEDIATE RELEASE

GPLN member Dako WorldWide Transport ships wind turbine components to Pakistan

Dako WorldWide Transport GmbH, a GPLN member from Duesseldorf in Germany, has recently shipped about 40.000 tons of wind turbine components from both Germany and China to Port Qasim in Pakistan. The cargoes were distributed on a total of six vessels. For the transport of 63 blades, each 50 meters in length, GPLN member Dako handled the pre-carriage from the place of manufacturing in inland China to the Port of Qinhuangdao, as well as the handling and FOB delivery. The Nacelles and drive trains which were shipped from Germany weighed about 50 tons each. The last shipment of this project reached Port Qasim at the beginning of June 2014. Dako was also responsible for the supervision of discharging and the local handling at the port.

To see some of Dako's moves please go to their album on the GPLN Facebook page:
