PRESS RELEASE

August 18, 2014

FOR IMMEDIATE RELEASE

GPLN member Universal Transport delivers wind power equipment in Germany

Universal Transport GmbH, a GPLN member from Germany, is presently busy with a series of wind power equipment deliveries in the Rhine-Main-Area. In all, they will complete 48 transports before the end of this month and will collect the pieces from four different manufacturer locations. The route covers about 580 kilometers with several obstacles along the way. For instance, from Bremen, GPLN member Universal Transport must bypass numerous road works along the A27 and make a detour of about 150 kilometers to Hamburg. But the biggest obstacle is the closure of the exit to this site which is just a few kilometers away from the wind park. The trucks must leave the motorway at a previous exit, adding additional time to each delivery. The measurements and weights of the individual components make multiple trips necessary. The tower segments have a length between 23.8 meters and 24.4 meters and weigh up to 45.4 tons, while the 85-ton nacelles measure 9.75 meters long, 4.24 meters wide and 3.85 meters high. The rotor blades are lighter, but are more than 60 meters long.

To see some of Universal Transport's' moves please go to their album on the GPLN Facebook page: <https://www.facebook.com/media/set/?set=a.10152078978156595.1073741922.250416211594&type=1>

About Global Project Logistics Network (GPLN)

The Global Project Logistics Network (GPLN) is the largest and most recognized non-exclusive projects logistics network specializing in international projects movements and specialized lifts.
