PRESS RELEASE

October 28, 2014

FOR IMMEDIATE RELEASE

GPLN member Global Shipping Services handles purification system

Global Shipping Services LLC, a GPLN member from New Jersey in USA, recently transported a complete purification system, coordinating cargoes from 12 suppliers located throughout the U.S. The main column was 861 x 161 x 156 inches, weighting 91,000 lbs. and the cargoes were consisting of approximately 1000 cubic meters and sent to the Port of Houston to be shipped on a single vessel to Callao, Peru. Global Shipping's logistics plan included purchasing several SOCs, export crating, surveyor reports, all inland to port transportation and Global Shipping staff at the port to oversee the loading. Loading was delayed due to bad weather in Houston. Over a period of 72 hours, GPLN member Global Shipping worked closely with the ship owners and port captains to manage the loading process.

For those interested to see some of Global Shipping Services's moves please go to their album on the GPLN Facebook page:
