**PRESS RELEASE**

November 26, 2014

**FOR IMMEDIATE RELEASE**

**The Freight Co., Ltd. displays at PowerLogistics Asia 2014**

Yangon - *November 26, 2014* – The Freight Co., Ltd with offices in Myanmar, Thailand and Vietnam exhibited for the 3<sup>rd</sup> year running at Southeast Asia’s premier project logistics and break bulk event. At this year’s event, The Freight Co., Ltd was highlighting their project logistics capabilities in Indochina and Myanmar. The Freight Co., Ltd is in a unique position being able to offer complete turnkey logistics packages to the energy, power and mining industry in all of these countries. By carefully selecting the appropriate equipment The Freight Co., Ltd delivers major savings to the industry in those countries where special equipment is still not widely available and cost to mobilize and demobilize such equipment are very high.

Patrick Dick, The Freight Co’s C.E.O. also spoke at the conference about the changes in Myanmar’s projects logistics 3 years after the “opening” of Myanmar. During his presentation he highlighted that the major changes happened before the “opening”. In the period before the opening Myanmar built a few power plants, 3 new ports and upgraded the airports of Yangon and Mandalay, Myanmar’s second largest city and gateway to China. He went on to say that in the last 3 years the Myanmar government focuses on the power grid and telecommunication. Both are badly needed if Myanmar wants to attract foreign investors. Sadly though ports, roads and the inland waterways all of which are badly needed to further develop Myanmar however have not drawn much attention he concluded.
