PRESS RELEASE

August 13, 2015

FOR IMMEDIATE RELEASE

GPLN member Highland Project Logistics handles shipment of wind mill blades from USA to Dominican Republic

Highland Project Logistics, a GPLN member from the United States, handled the shipment of 45 wind mill blades for 15 state-of-the-art wind turbines from Vestas USA. The shipment departed Houston Port to the Port of Cabo Rojo, Dominican Republic, on July 28, 2015.

Highland Project Logistics was contracted by fellow GPLN member Sparber Group from Bilbao, Spain, to shuttle 45 wind mill blades, each 180 feet long (55 meters) in specialized trucks from their origin in Brighton, CO to Houston, TX – a streamlined process that was expedited for completion in only three weeks, shuttling 15 trucks back and forth in 3 round trips each. The blades were then loaded onto a charter vessel that left from Houston in route to a wind farm in Cabo Rojo, Dominican Republic.

Highland Project Logistics coordinated all trucking, permit and port operations in Houston. The charter vessel to Cabo Rojo was arranged directly by Sparber in Spain who obtained the shipping contract from Vestas for this order.

“The selection of Highland Project by Sparber for this large-scale project reinforces our reputation for quality and reliability in our oversized and project cargo services,” says Radek Maly, President of Highland Project Logistics. “It also reinforces our strong position in the Houston project market, and globally.”

The joint cooperation between Sparber Group and Highland Project Logistics proves the strength of the GPLN network and the importance of regular meetings GPLN provides.

To see some of Highland Project Logistics’ moves please go to their album on the GPLN Facebook page: <https://www.facebook.com/media/set/?set=a.10150685915601595.383047.250416211594&type=3>

About Global Project Logistics Network (GPLN)

The Global Project Logistics Network (GPLN) is the largest and most recognized non-exclusive projects logistics network specializing in international projects movements and specialized lifts.
