PRESS RELEASE

September 20, 2013

FOR IMMEDIATE RELEASE

GPLN member CNC Freight Service ships Amine Drain Drum and Hydrocarbon Drain Drum (HDD) from Malaysia to Canada

GPLN member CNC from Malaysia secured an order for door to door transportation of 2 units Amine Drain Drum and Hydrocarbon Drain Drum (HDD) from Malaysia to Canada.

As there was a lack of conventional sailings to Canada, the oversized HDD had to be shipped separately to a different port of discharge (Seattle in USA) as a break bulk cargo on a container vessel. All remaining small cargoes were shipped in 4 x 40' open-top out gauge through Vancouver BC. Both shipments took place in August 2013.

The dimension of the HDD was as follows: L 1110 cm x W 366 cm x H 408 cm, with a gross weight @ 56,247 kg.

CNC consulted at very early stage GPLN member Rohde & Liesenfeld Canada Inc., in order to ascertain viability of the port to be used, route accessibility from the seaport and road permits issues.

Due to advance planning and close coordination with Rohde & Liesenfeld Canada Inc., the break bulk piece was delivered smoothly and timely, taking a total of 27 days from the vessel departure date up to the jobsite. The road journey from Seattle port to Tofield, AB took itself 5 days.

Pictures of CNC's moves can be seen on GPLN's Facebook pages:
